PROFILE SUMMARY

Informatics Engineering student possessing research experience in Artificial Intelligence (AI) and Natural Language Processing (NLP), alongside application development utilizing Python, Laravel, and Flutter. Proficient in constructing end-to-end machine learning pipelines, fine-tuning deep learning models, and performing image classification with PyTorch and HuggingFace Transformers. Has engaged in an international research initiative as an Exchange Research Student at the Kyushu Institute of Technology (Kyutech) in Japan and actively serves as a machine learning instructor at the Developer Student Club (DSC).

PROFESSIONAL EXPERIENCE

Exchange Research Student - NLP Laboratory, Kyutech

April 2026 - June 2026

- Developing an AI-driven speech recognition system for regional dialects with constrained data.
- Substantially enhance system accuracy by conducting data augmentation experiments and refining model parameters.
- Conducting the collection and annotation of original speech audio data to serve as a foundation for model training.

Computer Lab Assistant

January 2025 - Present

- Sustain laboratory infrastructure and offer technical support in addressing issues.
- Conducting research on natural language processing and automatic speech recognition systems for the analysis of South Sulawesi dialect speech.
- Supporting students in hands-on courses related to programming and software engineering.

UMI Developer Student Club Core Team - Machine Learning Division

January 2026 - June 2026

- Accountable as the lead for the Machine Learning domain at the DSC, Muslim University of Indonesia.
- Designing and delivering machine learning materials that encompass supervised learning, artificial neural networks, and model training.

Guiding club members through live machine learning projects and collaborative learning sessions.

EDUCATION

Kyushu Institute of Technology (Kyutech, Iizuka Campus, Japan)

April 2026 - June 2026

Exchange Students - Graduate Research Program

- Representing UMI in an international academic exchange initiative in partnership with Kyutech.
- Engaging in independent research under the mentorship of Prof. Kazutaka Shimada in the domain of Automatic Speech Recognition (ASR)

Muslim University of Indonesia

2023 - Present

- Bachelor of Information Engineering
- Temporary GPA: 3.87
- Publication: "Development of a Low-Resource Automatic Speech Recognition System for the Makassar Dialect" - published by the 2026 20th International Conference on Ubiquitous Information Management and Communication (IMCOM) DOI: 10.1109/IMCOM69009.2026.11360893

PROJECT

Laboratory Loan System

January 2026

PHP Native, MySQL, Bootstrap

- Develop a web-based laboratory loan management system to digitize the equipment and laboratory reservation procedures.
- Design modules for loan applications, approval processes, and usage monitoring.

SUPPLEMENTARY INFORMATION

- Code Languages & Frameworks:** Python, PHP (Laravel), Dart (Flutter), C++
- Languages:** Indonesian, English, basic Japanese.
- Certifications:** BNSP Junior Web Developer, NVIDIA Fundamentals of Deep Learning, Dicoding Basic Machine Learning, ITBox Intermediate Flutter Mobile Apps Course
- Soft Skills:** Research, Problem-Solving, Technical Writing, Team Collaboration
